Career Pathway	<p>History is highly valued by both universities and employers as it promotes thinking and organisational skills, as well as helping to understand why people think the way they do. The ability to deal with large amounts of information and then present it in a way that makes sense is something that all managers have to do on a regular basis. Studying History promotes the skills and ways of thinking that naturally lend themselves to management roles within any organisation, local government, the Civil Service, teaching, journalism, the legal profession or even self-employment.</p>
